

### Customer

ETI Design Office  
Grenoble, France

### Business issues

- Create joints between curved welded and tapered beams
- Get workshop drawings and NC-DSTV files from these elements

*"Advance Steel was very useful thanks to the collision detection tool that enabled us to check nothing came between the various roof structure elements"*

Mr Berger, Project Manager

### Business results

- Structural modelling achieved in a 3-month period
- Fast and easy DSTV files' creation
