

## Customer

Innovations-Verbund-Systeme GmbH  
Duisburg, Germany

## Business issues

- Funnel-shaped canopy
- Modeling of specific profiles
- Symmetrical modification in flange shape

*"We are very satisfied with the ease of use of the Access database of Advance Steel. We were also convinced by the excellent customer support, the easy operation of the software and last but not least by the good price-performance ratio".*

## Business results

- Good price/performance investment ratio
- User friendly software which allows handling of straight and curved elements
- Easy to create custom profiles and to store them in a library for a later reuse
- Working in 3D makes the conception easier

Mr. Peter Mertens , Structural Engineer
