

Customer

NCA Container- und Anlagenbau GmbH
St. Paul, Austria

Business issues

- The construction mainly consists of 3D rolled pipes
- Each single pipe has elliptical-shaped radii on two levels

Business results

- Advance Steel prepares double offsets
- 3D-modeling saved us a lot of time

"The fact that Advance Steel processes all information from the 3D model automatically leads to the easy creation of the documents and enables the conformity of all drawings and documents"

Mr Dohr, Construction Engineer
