

### Customer

Biuro Inżynierskie Tomasz Białek  
Mieroszów, Poland

### Business issues

- Steel tower with supporting elements for antenna.

### Business results

- Easy model transfer and synchronization between Advance Design and Advance Steel.
- Very efficient work thanks to the tools in Advance Steel for preparing workshop documentation— a lot of drawing styles for many different types of drawings.

*" Make use of interoperability between Advance Design and Advance Steel makes calculation and detailing processes very quick and efficient. Moreover, Advance software supports designer in case of any changes in the model and documentation during all stages of the project cycle."*

*Mr. Michał Nowicki,  
Designer*
