

### Customer

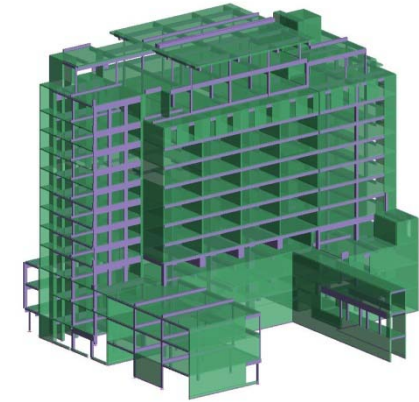

Sigma Ingénierie  
Le Mans, France

### Business issues

- 3D modeling of the building and Optimization of all elements
- Modeling of the concrete frame
- Creation of the formwork drawings

### Business results

- Modeling of the building
- Modeling of the concrete frame with Advance Design
- Creation of the formwork drawings with Advance Concrete

*“Advance Design and Advance Concrete help viewing the building in 3D and optimizing our productivity both from the design and the drawing point of view. The software enables intuitive and user friendly data processing which shortens the adaptation time .”*

Nicolas BRETON – Denis LAMBERT
